To whom it may concern.

RE: Unit M, Cocker Avenue, Poulton Business Park, Poulton-le-Fylde. FY6 8JU

I am writing to confirm that the subject property is exempt from requiring an EPC certificate under The Energy Performance of Buildings (Certificates and Inspections) (England and Wales) Regulations 2007.

I attended and inspected the property on November 22, 2022.

The building has no heating, mechanical ventilation or air-conditioning, nor do I consider any of these to have been present and been removed to evade the requirement to provide a certificate.

There are no spaces that should be assumed to be conditioned by non-domestic EPC conventions under an assumed fit-out under the requirements in Section 6 of the Building Regulations. Consequently, the only activities within the building are workshop activities in spaces where conditioning is not a requirement under the aforementioned conventions and a WC, which under convention 6.11.g is exempt by virtue of it being the ONLY zone in the building that would otherwise have an expectation of conditioning.

Kind Regards
