

## Electrical Installation Condition Report

Requirements for Electrical Installations - BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

### **Guidance for recipients:**

### This report is an important and valuable document which should be retained for future reference.

- 1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may limitations of this inspection, be fully identified. Such give rise to danger (see Section K).
- 2. This Report is only valid if accompanied by the Inspection Schedule(s) and the Schedule(s) of Circuit Details and Test Results.
- 3. The person ordering the Report should have received the original Report and the inspector should have retained a duplicate.
- 4. The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner / occupier with details of the condition of the electrical installation at the time the Report was issued.
- 5. Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
- 6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.
- 7. For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at confirm it is in operational condition in accordance with risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.
- 8. For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

- 9. Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result in a code C1 or C2 could not, due to the extent or observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).
- 10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit /distribution board (where required).
- 11. Where the installation includes a residual current device (RCD) it should be tested six-monthly by pressing the button marked 'T' or 'Test'. The device should switch off the supply and should then be switched on to restore the supply. If the device does not switch off the supply when the button is pressed, seek expert advice. For safety reasons it is important that this instruction is followed.
- 12. Where the installation includes an arc fault detection device (AFDD) having a manual test facility it should be tested six-monthly by pressing the test button. Where an AFDD has both a test button and automatic test function, manufacturer's instructions shall be followed with respect to test button operation.
- 13. Where the installation includes a surge protective device (SPD) the status indicator should be checked to manufacturer's information. If the indication shows that the device is not operational, seek expert advice. For safety reasons it is important that this instruction is followed.
- 14. Where the installation includes alternative or additional sources of supply, warning notices should be found at the origin or meter position or, if remote from the origin, at the consumer unit or distribution board and at all points of isolation of all sources of supply.

FT/EICR 3345200001032

for Industrial/Commercial Premises

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18<sup>th</sup> Edition)

Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal	N/
damage, arcing or overheating)(411.3.2; 411.4; 411.5; 411.6; Sections 432; 433)	
Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
BUTION EQUIPMENT CONT.	
Protection against mechanical damage where cables enter equipment (522.8.1; 522.8.5; 522.8.11)	
Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1)	
Confirmation indication that the SPD is functional (534.1, 651.4)	(NA)
BUTION CIRCUITS	
dentification of conductors (514.3.1)	NA
Cables correctly supported throughout their run (521.10.202; 522.8.5)	N/A
Condition of insulation of live parts (416.1)	N/A
Non-sheathed cables protected by enclosure in conduit, ducting or trunking. (521.10.1)	N/A
Suitability of containment systems for continued use (including flexible conduit) (Section 522)	N/A
Cables correctly terminated in enclosures (Section 526)	NA
Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure (526.1)	(N/A
Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6)	(N/A
Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	
Adequacy of protective devices: type and rated current for fault protection (411.3)	
Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	
Coordination between conductors and overload protective devices (433.1; 533.2.1)	
Cable installation methods/practices with regard to the type and nature of installation and external influences (Section 522)	
Where exposed to direct sunlight, cable of a suitable type (522.11.1)	
ES CONCEALED UNDER FLOORS, ABOVE CEILINGS, IN WALLS/PARTITIONS LESS THAN 50 MM FROM A SURFACE, AI S CONTAINING METAL PARTS	ND IN
Installed in prescribed zones (see Section D. Extent and limitations) (522.6.202)	
Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical	
damage by nails, screws and the like (see Section D. Extent and limitations) (522.6.204)	
Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	
Band II cables segregated/separated from Band I cables (528.1)	
Cables segregated/separated from non-electrical services (528.3)	
Condition of circuit accessories (651.2)	
Suitability of circuit accessories for external influences (512.2)	$\bigcirc$
Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
Adequacy of connections, including cpc's, within accessories and to fixed and stationary equipment – identify/ record	
	$\overline{\underline{\hspace{1cm}}}$
	$\overline{\underline{\hspace{1cm}}}$
Temperature rating of cable insulation (522.1.1; Table 52.1)	$\underline{\hspace{0.1cm}}$

Presence of RCD six-monthly test notice at or near equipment, where required (514.12.2)  Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15)  Presence of other required labelling (Please specify) Section 514)  Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433)  Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3))  Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11)	<b>3</b>
	damage, arcing or overheating (At11.3.2, 411.4, 411.5, 411.6, Sections 432, 433) Single-pole witching or protective devices in line conductors only (132.14.1, 530.3.3) SUTION EQUIPMENT CONT.  Protection against electromagnetic effects where cables enter requipment (522.8.1, 522.8.5, 522.8.11) Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1) Confirmation indication that the SPD is functional (534.1, 651.4) SUTION CIRCUITS  dentification of conductors (514.3.1) Cables correctly supported throughout their run (521.10.202; 522.8.5) Condition of inustation of live parts (416.1) Non-sheathed cables protected by enclosure in conduit, durcting or trunking, (521.10.1) Suitability of containment systems for continued use (including flexible conduit) (Section 522) Cables correctly terminated in enclosures (Section 526) Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure (526.1) Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6) Adequacy of protective devices: type and rated current for fault protection (411.3) Presence and adequacy of irricult protective conductors (411.3.1.1; 543.1) Coordination between conductors and overload protective devices (433.1; 533.2.1) Cable installation methods/practices with regard to the type and nature of installation and external influences (Section 522) Where exposed to direct sunlight, cable of a suitable type (522.1.1) SCONCEALED UNDER FLOORS, ABOVE CEILINGS, In WALLS/PARTITIONS LESS THAN 50 MM FROM A SURFACE, Al SCONTAINING METAL PARTS  Installed in prescribed zones (see Section D. Extent and limitations) (522.6.202) Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical damage by paints, screws and the like (see Section D. Extent and limitations) (522.6.204) Provision of fire barriers, sealing arrangements and protection against therma

### **ELECTRICAL INSTALLATION CONDITION REPORT - Schedule of** Inspections

FT/EICR 3345200001032

for Industrial/Commercial Premises

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18<sup>th</sup> Edition)

		N
7 20	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are	
7.20	tight and secure (526.1)	
7.21	Adequate arrangements where a generating set operates as a switched alternative to public supply (551.6)	N/A
7.22	Adequate arrangements where a generating set operates in parallel with public supply (551.7)	(N/A
FINAL	CIRCUITS	
8.1	Identification of conductors (514.3.1)	
8.2	Cables correctly supported throughout their run (521.10.202; 522.8.5)	
8.3	Condition of insulation of live parts (416.1)	
		<u> </u>
8.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking. (521.10.1)	$\sim$
8.4.1	To include the integrity of conduit and trunking systems (metallic and plastic)	$\underline{\hspace{0.1cm}}$
8.5	Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	$\underline{\underline{\hspace{0.5cm}}}$
8.6	Coordination between conductors and overload protective devices (433.1; 533.2.1)	$\overline{}$
8.7	Adequacy of protective devices: type and rated current for fault protection (411.3)	
8.8	Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	✓
8.9	Wiring system(s) appropriate for the type and nature of the installation and external influences (Section 522)	
8.10	Cables Concealed Under Floors, Above Ceilings Or In Walls/ Partitions, Adequately Protected Against Damage (522.3.201, 202, 203, 204)	<b>Q</b>
3.10.1	Installed in prescribed zones (see Section D. Extent and limitation) (522.6.201, 204)	
3.10.2	Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical damage by nails, screws and the like (see Section D. Extent and limitations) (522.6.201; 522.6.204)	<b>Q</b>
PROV	ISION OF ADDITIONAL PROTECTION/REQUIREMENTS BY 30 mA RCD	
.12.1	For all socket-outlets of rating 32 A or less unless an exception is permitted (411.3.3)	
		<u> </u>
.12.2	For the supply of mobile equipment not exceeding 32 A rating for use outdoors (411.3.3)	
.12.3	For cables concealed in walls at a depth of less than 50 mm (522.6.202; 522.6.203)	<u> </u>
.12.4	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)	$\sim$
.12.5	Final circuits supplying luminaries within domestic (household) premises (411.3.4)	Œ
.12.6	For lighting that is accessible to the public (714.411.3.4)	
8.13	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	
FINAL	CIRCUITS CONT.	
9.14	Band II cables segregated/separated from Band I cables (528.1)	
9.15	Cables segregated/separated from communications cabling (528.2)	
9.16	Cables segregated/separated from non-electrical services (528.3)	
9.17	Terminations of cables at enclosures - indicate extent of sampling in Section D of the report (Section 526)	
.17.1	Connection soundly made and under no undue strain (526.6)	$\underline{\hspace{1cm}}$
.17.2	No basic insulation of a conductor visible outside enclosure (526.8)	$\sim$
.17.3	Connections of live conductors adequately enclosed (526.5)	
.17.4	Adequately connected at point of entry to enclosure (glands, bushes etc.) (522.8.5)	<b>Q</b>
9.18	Condition of accessories including socket-outlets, switches and joint boxes (651.2 (v))	
9.19	Suitability of accessories for external influences (512.2)	Ž.
9.20		_
	Adequacy of working space/accessibility to equipment (132.12; 513.1)	$\sim$
9.21	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
	ATION AND SWITCHING	
0.1.1	Presence and condition of appropriate devices (Section 462; 537.2.7)	(N/A
ISOL	ATOR (SECTIONS 460; 537)	
0.1.2	Acceptable location – state if local or remote from equipment in question (Section 462; 537.2.7)	(N/A
0.1.3	Capable of being secured in the OFF position (462.3)	N/A N/A
0.1.4	Correct operation verified (643.10)	(N/A
0.1.5	Clearly identified by position and/or durable marking (537.2.6)	
0.1.6	Warning label posted in situations where live parts cannot be isolated by the operation of a single device (514.11.1; 537.1.2)	(N/F
		U.
	CHING OFF FOR MECHANICAL MAINTENANCE (SECTION 464; 537.3.2)	
0.2.1	Presence and condition of appropriate devices (464.1; 527.3.2)	
0.2.2	Acceptable location – state if local or remote from equipment in question (537.3.2.4)	
0.2.3	Capable of being secured in the OFF position (462.3)	$\overline{}$
0.2.4	Correct operation verified (643.10)	<b>₹</b>
0.2.5	Clearly identified by position and/or durable marking (537.3.2.4)	V
EMEF	GENCY SWITCHING/STOPPING (SECTION 465; 537.3.3)	
0.3.1	Presence and condition of appropriate devices (Section 465; 537.3.3; 537.4)	(N/A
0.3.2	Readily accessible for operation where danger might occur (537.3.3.6)	N/A
0.3.3	Correct operation verified (643.10)	
		(NA
0.3.4	Clearly identified by position and/or durable marking (537.3.3.6)	(N/A
	TIONAL SWITCHING (SECTION 463; 537.3.1)	
0.44	Presence and condition of appropriate devices (537.3.1.1; 537.3.1.2)	
0.4.1	Correct operation verified (537.3.1.1; 537.3.1.2)

FT/EICR 3345200001032

for Industrial/Commercial Premises

Requirements for Electrical Installations BS7671:2018+A2:2022 (IET Wiring Regulations 18<sup>th</sup> Edition)

11.0 CURR	NT-USING EQUIPMENT (PERMANENTLY CONNECTED)									
11.1	Condition of equipment in terms of IP rating etc (416.2)									
11.2	Equipment does not constitute a fire hazard (Section 421)									
11.3	Enclosure not damaged/deteriorated so as to impair safety (134.1.1; 416.2; 512.2)									
11.4	Suitability for the environment and external influences (512.2)									
11.6	Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire: List number and location of luminaires inspected (separate page) (527.2)									
11.5	Security of fixing (134.1.1)									
1.7 RECES	SED LUMINAIRES (DOWNLIGHTERS)									
11.7.1	Correct type of lamps fitted (559.3.1)									
11.7.2	Installed to minimize build-up of heat by use of "fire rated" fittings, insulation displacement box or similar (421.1.2)									
11.7.3	No signs of overheating to surrounding building fabric (559.4.1)									
11.7.4	No signs of overheating to conductors/terminations (526.1)	(NA)								
2.0 PART	SPECIAL INSTALLATIONS OR LOCATIONS									
12.1	If any special installations or locations are present, list the particular inspections applied.									
3.0 PROSI	IMER'S LOW VOLTAGE ELECTRICAL INSTALLATION(S)									
13.1	Where the installation includes additional requirements and recommendations relating to Chapter 82, additional inspection items should be added to the checklist.									
Inspector'	S Name: Indiana Foxx Signature: Indiana Foxx
